PROTECTIVE ELEMENT FOR A BREAKWATER OR WAVE-RETARDING
CONSTRUCTION

SUPPLEMENTAL INFORMATION DISCLOSURE STATEMENT

Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

April 25, 2005

Sir:

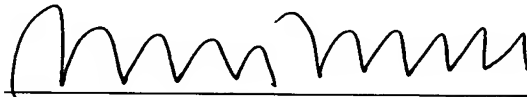

In compliance with Rules 1.97 and 1.98, and in fulfillment of the duty of disclosure under Rule 1.56, the cited document is made of record on the enclosed PTO Form-1449.

A concise explanation of the relevance of this item is that this reference was cited in the corresponding International Application Serial No. PCT/NL 03/00541, filed July 24, 2003. The reference discloses a method for processing mineral waste of specific compositions, in particular a method for manufacturing concrete stones from waste materials which have been delivered to the manufacturer including a specific analysis of the components CaO, SiO₂, Al₂O₃, Fe₂O₃, trace elements, organic components and water content. Particle size is of importance. A mixture is made from the several waste materials which are fit for concrete manufacturing, and which can be dosed in a simple way and which can flow. To that end, the particle size is smaller

than 3 mm. In particular, the material thus obtained can be used as a replacement material or correction component for concrete.

Respectfully submitted,

YOUNG & THOMPSON
